ARUNACHAL PRADESH

Prosperity from the Highlands

Turning natural advantage into resilient rural growth

A STATEWIDE VALUE-CHAIN OPPORTUNITY

High-altitude farms • scientific production • aggregation • value addition • reliable logistics • premium markets

Arunachal Pradesh is building a future-ready kiwi economy founded on natural strengths, progressive growers and expanding horticultural capabilities. The ambition is not production alone. It is an integrated system that protects quality, raises value realisation and connects remote hill districts with growing domestic and international markets.

A SHARED DEVELOPMENT COMMITMENT

- Sustainable livelihoods for hill communities
- Higher productivity and better-quality fruit
- Stronger farmer institutions and rural enterprises
- Scientific post-harvest management
- Greater participation of SHGs, FPOs and local youth
- Wider domestic access with progressive export readiness
- Climate-responsive, responsible horticultural growth

GOVERNMENT OF ARUNACHAL PRADESH

ARUNACHAL KIWI

Naturally Highland. Naturally Distinctive.

INDIA'S LEADING KIWI-PRODUCING STATE

Cultivated in the pristine highlands of Arunachal Pradesh, kiwi is emerging as a high-value horticultural opportunity with the potential to strengthen livelihoods, rural enterprise and market-led growth.

MORE THAN A FRUIT

A highland identity • a farmer-income opportunity • a modern horticulture value chain

2025 SNAPSHOT

2,800+ ha	7,000+ MT	14
AREA	OUTPUT	POTENTIAL DISTRICTS

2047 VISION

~8,000 hectares | ~1,20,000 MT annually

FROM EASTERN HIMALAYAN FARMS TO INDIA'S GROWING FRUIT MARKETS

THE HIGHLAND EDGE

Why Arunachal Kiwi Stands Apart

A distinctive product shaped by altitude, climate and place

A NATURAL HIGHLAND ADVANTAGE

Temperate and high-altitude landscapes, sloping terrain, adequate chilling and rainfall create favourable conditions across Ziro, West Kameng and other suitable districts. The resulting production environment supports fruit quality, flavour and an authentic highland provenance.

DISTINCTIVE PRODUCT ATTRIBUTES

- High-altitude origin with recognized sweetness, juiciness and flavour
- Rich in Vitamin C, Vitamin E, fibre, potassium and antioxidants
- Suitable for fresh fruit, juice, candy, pulp, dried products and other value-added forms
- Harvest availability when supplies from some competing origins begin to recede
- Aligned with demand for nutritious, premium and responsibly produced fruit

ORGANIC MILESTONE

Kiwi grown in the state received organic certification in 2020 bringing national recognition to the state's produce

PRINCIPAL CULTIVATED VARIETIES

HAYWARD | MONTY | ALLISON | BRUNO

Hayward is relevant to premium markets for size, taste profile, shelf life and preference. Allison and Monty form a major share of the current production base.

THE MARKET PROPOSITION

Premium fresh fruit + purposeful value addition + a credible highland origin story

01 / PRODUCTION LANDSCAPE

Kiwi Geography

Established clusters. Emerging frontiers. One connected opportunity.

11 DISTRICTS • ONE HIGHLAND OPPORTUNITY

Mature production anchors, commercial belts and planned expansion frontiers form a connected highland geography.

ESTABLISHED PRODUCTION ANCHORS

LOWER SUBANSIRI | ZIRO	WEST KAMENG
Leading production landscape with established growers, nurseries and collective marketing experience.	Dirang, Shergaon, Rupa, Kalaktang, Tenga Valley and Budhagaon form an established commercial belt

PLANNED EXPANSION FRONTIERS

SHI-YOMI | DIBANG VALLEY

Agro-climatic potential provides the basis for planned expansion into new production areas.

STATEWIDE KIWI-POTENTIAL BELT

- WESTERN BELT | Tawang • West Kameng
- CENTRAL BELT | Lower Subansiri • Kamle • Kra Daadi • Kurung Kumey • Upper Subansiri
- EASTERN & NORTHERN BELT | Shi-Yomi • Upper Siang • Anjaw • Dibang Valley

CLUSTER LOGIC

AGGREGATE	UTILISE
Concentrate produce for efficient collection and handling	Improve use of packhouses, cold chain and processing assets
ASSURE	**CONNECT**
Enable extension, grading, traceability and quality control	Link production belts to processors, buyers and premium markets

ORCHARD-TO-MARKET

Established anchors provide scale and experience. Emerging districts widen the production base. Shared post-harvest, processing and market systems connect both.

02 / INTEGRATED VALUE CHAIN

From Orchard to Market

Protecting quality. Reducing loss. Creating value.

The sector's next phase must move beyond production alone. A connected value chain can preserve fruit quality, reduce avoidable losses, unlock processing opportunities and improve access to higher-value markets.

01 — QUALITY PLANTING MATERIAL
Reliable, true-to-type planting material and stronger nursery systems.

02 — SCIENTIFIC ORCHARDS
Improved orchard layout, trellising, nutrition, training and crop management.

03 — RIGHT-MATURITY HARVEST
Harvest discipline and careful handling to protect quality and shelf life.

04 — AGGREGATE • GRADE • PACK
Collective aggregation, quality sorting and appropriate packaging.

05 — COLD CHAIN • PROCESS
Pre-cooling, storage and value addition to reduce loss and extend marketability.

06 — MARKETS • CONSUMERS
Premium retail, institutions, e-commerce and progressive export readiness.

MORE VALUE FROM EVERY FRUIT

Premium grades for fresh markets. Lower grades for juice, candy, pulp, squash and other products. New enterprise space for SHGs, FPOs, youth and local

03 / GROWTH & IMPLEMENTATION

From Vision to Delivery

A high-growth trajectory backed by two complementary state initiatives.

GROWTH TRAJECTORY

YEAR	AREA	PRODUCTION
2025	2,807 ha	7,053 MT
2030	~3,500 ha	~21,000 MT
2035	~4,500 ha	~40,000 MT
2040	~6,000 ha	~72,000 MT
2047	~8,000 ha	~1,20,000 MT

2047 TRANSFORMATION

Nearly 3× cultivated area | Around 17× annual output

TWO ONGOING PROJECTS: A COMPLEMENTARY APPROACH

1 | KIWI AS THE USP OF ARUNACHAL PRADESH

An end-to-end value-chain project focused on quality planting material, scientific production, post-harvest and logistics infrastructure, value addition, branding, market linkage and export readiness.

DELIVERY FOCUS | From production-centric growth to a market-led, value-chain system

2 | ARUNACHAL KIWI MISSION

A 10-year State Mission covering area expansion, quality planting material, capacity building, processing, value addition, branding, marketing and establishment of a Centre of Excellence.

MISSION HORIZON | 2025-26 to 2034-35 |

ARUNACHAL KIWI • A SIGNATURE STATE USP

Highland provenance + organic recognition + nutritional value + integrated value-chain development

ONE STATE • TWO COMPLEMENTARY INITIATIVES • ONE MARKET-LED KIWI ECONOMY
